

GNUR 599 : Advanced Generalist Nursing Capstone II

This is part II of the clinical nurse leader capstone experience. Students employ skills and knowledge gained throughout the MSN program to implement and evaluate a process improvement project in the assigned clinical microsystem. Students explore key concepts in clinical leadership, clinical outcomes management, management of the patient care environment and the role of the advanced generalist Clinical Nurse Leader. The course is structured to examine preparation for the Clinical Nurse Leader certification and role implementation and will require the student to engage in the clinical environment for 160 hours over the course of the semester.
